

Royal Observatory, Greenwich,  
London, I.E.

1858 February 5

My dear Sir

I have just heard  
from Mr. Pentland that the  
copy of Hansen's Tables  
dela Lune has not reached  
you. I find on inquiry

that it was shipped by  
Mr. C. G. Molini of  
London to Mr. Luigi  
Molini of Firenze

M Per 20

Padre Secchi

the the the

on October 20. I do not  
doubt that it is lying in  
Mr. L. Molini's hands.

Will you take the trouble  
of writing to Mr. L. Molini  
to beg that it may be  
sent to you speedily?

I am glad to hear from  
Mr. Pentland that you have  
been so advantageously employed  
on the physical appearance  
of the Moon. Do your  
observations confirm the

remarks lately made in  
the Comptes Rendus,  
that the basins of the  
large craters are very  
much depressed below the  
general surface of the  
Moon?

Yours, my dear Sir,

Yours very truly

G. H. King
